PROFESSIONAL SUMMARY

Product Engineer and UI/UX Designer passionate about building intuitive, user-centered digital products that solve real-world problems. I combine product thinking, frontend development, and AI-assisted workflows to design and develop responsive web applications from concept to MVP.

Skilled in UI/UX design, user research, wireframing, prototyping, React, Next.js, TypeScript, and modern frontend technologies. Eager to contribute to collaborative teams by designing and building scalable, accessible, and impactful digital products while delivering meaningful solutions and continuously growing as a Product Engineer.

TECHNICAL SKILLS

Product Design

• UI/UX Design • User Research • Wireframing • Prototyping • Information Architecture • Design Systems • Interaction Design

Frontend Development

• HTML5 • CSS3 • JavaScript • TypeScript • React • Next.js • Tailwind CSS • Responsive Web Design

Tools

• Figma • VS Code • Git • GitHub • Antigravity • Vercel • FigJam

AI & Product

• ChatGPT • Claude • AI-assisted MVP Development • Product Thinking • Prompt Engineering • User Flows • Product Documentation

PROFESSIONAL EXPERIENCE

Product Engineer Trainee | UI/UX Designer

Dev & Design Bootcamp (Remote)

October 2025 – July 2026

• Completed an intensive Product Engineering and UI/UX Design training focused on AI-assisted MVP development and product thinking.

- Designed responsive user interfaces and developed scalable web applications using modern frontend technologies and AI-assisted development workflows.

- Collaborated within cross-functional teams using GitHub, Antigravity, and agile product development practices to deliver MVPs.

- Applied user research, wireframing, prototyping, and responsive frontend development to build intuitive, user-centered digital experiences.

KEY PROJECTS

StudyFlow

AI-Powered Learning Companion

AI-powered learning companion that helps students organize their studies through personalized study plans, AI tutoring, quizzes, progress tracking, and productivity tools.

Tech Stack: *Next.js, TypeScript, Tailwind CSS, React, Antigravity*

- Designed and built an AI-powered study platform that helps students create study plans, manage learning tasks and interact with an AI study assistant.

- Designed responsive user interfaces and user flows to improve the learning experience across desktop and mobile devices.

- Collaborated using AI-assisted product development workflows from idea validation to MVP design and implementation.

MailMint

AI Cold Email Outreach Platform

AI-powered cold email outreach platform that helps users create, manage, and automate personalized email outreach sequences for lead generation.

Tech Stack: *Next.js • React • TypeScript • Tailwind CSS*

- Designed and developed a modern email marketing platform focused on usability and campaign management.

- Created intuitive dashboard layouts, responsive interfaces and reusable design components.

- Applied user-centered design principles to simplify navigation and improve the overall product experience.

EDUCATION

Diploma in Philosophy

Lagos State University (LASU)

Lagos, Nigeria

2025 – 2026

CERTIFICATIONS

UI/UX Design, AI-assisted MVP Development & Product Thinking

Dev & Design

Digital Marketing

HubSpot Academy

AI-assisted MVP Development & Product Thinking

Dev & Design

CORE COMPETENCIES

- Product Thinking
- Problem Solving
- Cross-functional Collaboration
- User-centered Design
- AI-assisted Development
- Agile Workflow
